- Web Deployment

EXPERIENCE

Full-Stack Developer (React & Laravel) (Ongoing) | 06/2024 – Present

KarMuqabla

- Developing and maintaining scalable full-stack web applications utilizing React.js, Next.js, and Laravel.
- Built and consumed REST APIs for seamless data flow between React and Laravel .
- Managing state using Redux / Context API for smoother, interactive frontend user experiences.
- Leveraged Capacitor to successfully package the React web application into a cross-platform mobile app.

MERN Stack Developer (Part-time) | 12/2023 - 05/2024

Vibrant Company

- Built responsive components using React.js and Tailwind CSS.
- Improved performance by optimizing rendering logic and asset loading.
- Worked with Node.js and MongoDB to connect frontend with backend APIs.
- Managed the full software development life cycle for client projects, from initial requirement gathering to final deployment on hosting platforms like Namecheap and GoDaddy.

Freelance PHP Developer | 06/2023 - 10/2023

Upwork

- Delivered 5+ client projects with 100% satisfaction, using PHP and MySQL.
- Integrated third-party APIs like Stripe.
- Optimized database queries, reducing load times by up to 40%.
